QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2014

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number: 001-33638

INTERNATIONAL TOWER HILL MINES LTD.

(Exact Name of Registrant as Specified in its Charter)

British Columbia, Canada

(State or other jurisdiction of incorporation or organization)

N/A

(I.R.S. Employer Identification No.)

**2300-1177 West Hastings Street
Vancouver, British Columbia, Canada, V6E 2K3**
(Address of Principal Executive Offices)

V6E 2K3
(Zip code)

Registrant's telephone number, including area code: **(604) 683-3332**

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated Filer

Accelerated Filer

Non-Accelerated filer
(Do not check if a smaller reporting company)

Small Reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of November 3, 2014, the registrant had 98,068,638 Common Shares outstanding.

CAUTIONARY NOTE TO U.S. INVESTORS REGARDING ESTIMATES OF MEASURED, INDICATED AND INFERRED RESOURCES AND PROVEN AND PROBABLE RESERVES

International Tower Hill Mines Ltd. (“we”, “us”, “our,” “ITH” or the “Company”) is a mineral exploration company engaged in the acquisition and exploration of mineral properties. As used in this Quarterly Report on Form 10-Q, the terms “mineral reserve”, “proven mineral reserve” and “probable mineral reserve” are Canadian mining terms as defined in accordance with Canadian National Instrument 43-101—Standards of Disclosure for Mineral Projects (“NI 43-101”) and the Canadian Institute of Mining, Metallurgy and Petroleum (the “CIM”)—CIM Definition Standards on Mineral Resources and Mineral Reserves, adopted by the CIM Council, as amended. These definitions differ from the definitions in the United States Securities and Exchange Commission (“SEC”) Industry Guide 7 (“SEC Industry Guide 7”). Under SEC Industry Guide 7 standards, a “final” or “bankable” feasibility study is required to report reserves, the three-year historical average price is used in any reserve or cash flow analysis to designate reserves, and the primary environmental analysis or report must be filed with the appropriate governmental authority. In addition, the terms “mineral resource”, “measured mineral resource”, “indicated mineral resource” and “inferred mineral resource” are defined in and required to be disclosed by NI 43-101; however, these terms are not defined terms under SEC Industry Guide 7 and are normally not permitted to be used in reports and registration statements filed with the SEC. Investors are cautioned not to assume that all or any part of a mineral deposit in these categories will ever be converted into reserves.

“Inferred mineral resources” have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all, or any part, of an inferred mineral resource will ever be upgraded to a higher category. Under Canadian rules, estimates of inferred mineral resources may not form the basis of feasibility or pre-feasibility studies, except in rare cases. Investors are cautioned not to assume that all or any part of an inferred mineral resource exists or is economically or legally mineable.

Disclosure of “contained ounces” in a resource is permitted disclosure under Canadian regulations; however, the SEC normally only permits issuers to report mineralization that does not constitute “reserves” by SEC standards as in place tonnage and grade without reference to unit measures. Accordingly, information contained in this report and the documents incorporated by reference herein contain descriptions of our mineral deposits that may not be comparable to similar information made public by U.S. companies subject to the reporting and disclosure requirements under the United States federal securities laws and the rules and regulations thereunder.

The term “mineralized material” as used in this Quarterly Report on Form 10-Q, although permissible under SEC Industry Guide 7, does not indicate “reserves” by SEC Industry Guide 7 standards. We cannot be certain that any part of the mineralized material will ever be confirmed or converted into SEC Industry Guide 7 compliant “reserves”. Investors are cautioned not to assume that all or any part of the mineralized material will ever be confirmed or converted into reserves or that mineralized material can be economically or legally extracted.

CAUTIONARY NOTE TO ALL INVESTORS CONCERNING ECONOMIC ASSESSMENTS THAT INCLUDE INFERRED RESOURCES

The Company currently holds or has the right to acquire interests in an advanced stage exploration project in Alaska referred to as the Livengood Gold Project (the “Livengood Gold Project” or the “Project”). Mineral resources that are not mineral reserves have no demonstrated economic viability. The preliminary assessments on the Project are preliminary in nature and include “inferred mineral resources” that have a great amount of uncertainty as to their existence, and are considered too speculative geologically to have economic considerations applied to them that would enable them to be categorized as mineral reserves. It cannot be assumed that all, or any part, of an inferred mineral resource will ever be upgraded to a higher category. Under Canadian rules, estimates of inferred mineral resources may not form the basis of feasibility or pre-feasibility studies. There is no certainty that such inferred mineral resources at the Project will ever be realized. Investors are cautioned not to assume that all or any part of an inferred mineral resource exists or is economically or legally mineable.

FORWARD LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains forward-looking statements or information within the meaning of the United States Private Securities Litigation Reform Act of 1995 concerning anticipated results and developments in the operations of the Company in future periods, planned exploration activities, the adequacy of the Company's financial resources and other events or conditions that may occur in the future. Forward-looking statements are frequently, but not always, identified by words such as "expects," "anticipates," "believes," "intends," "estimates," "potential," "possible" and similar expressions, or statements that events, conditions or results "will," "may," "could" or "should" (or the negative and grammatical variations of any of these terms) occur or be achieved. These forward looking statements may include, but are not limited to, statements concerning:

- the Company's ability to meet its financial obligations as they come due, and to be able to raise the necessary funds to continue operations on acceptable terms, if at all;
- the Company's strategies and objectives, both generally and specifically in respect of the Livengood Gold Project;
- the potential for the expansion of the estimated resources at the Livengood Gold Project;
- the potential for a production decision concerning, and any production at, the Livengood Gold Project;
- the potential for cost savings due to the high gravity gold concentration component of some of the Livengood Gold Project mineralization;
- the sequence of decisions regarding the timing and costs of development programs with respect to, and the issuance of the necessary permits and authorizations required for, the Livengood Gold Project;
- the Company's estimates of the quality and quantity of the resources at the Livengood Gold Project;
- the timing and cost of the planned future exploration programs at the Livengood Gold Project, and the timing of the receipt of results therefrom;
- the Company's future cash requirements;
- general business and economic conditions, including changes in the price of gold and the overall sentiment of the markets for public equity;
- the ability of the Company to continue to refine the project economics for the Livengood Gold Project;
- the potential for opportunities to reduce capital costs for the Livengood Gold Project;
- the potential for opportunities to improve the economics of the Livengood Gold Project by reducing certain costs, including through the reduction of reagent consumption and energy costs, and improving recovery through intensive cyanide leach of gravity concentrates; and
- the potential for opportunities to improve the economics of the Livengood Gold Project by enhancing mill head grades through stockpile management strategies and/or additional test work to confirm drill assays of the resource.

Such forward-looking statements reflect the Company's current views with respect to future events and are subject to certain known and unknown risks, uncertainties and assumptions. Many factors could cause actual results, performance or achievements to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others:

- the demand for, and level and volatility of the price of, gold;
 - general business and economic conditions;
 - government regulation and proposed legislation (and changes thereto or interpretations thereof);
-

Table of Contents

- defects in title to other claims, or the ability to obtain surface rights, either of which could affect our property rights and claims;
- the timing of the receipt of regulatory and governmental approvals, permits and authorizations necessary to implement and carry on the Company's planned exploration and potential development program at the Livengood Gold Project;
- conditions in the financial markets generally, the overall sentiment of the markets for public equity, interest rates and currency rates;
- the Company's ability to secure the necessary consulting, drilling and related services and supplies on favorable terms in connection with its drilling program at the Livengood Gold Project and other activities;
- the Company's ability to attract and retain key staff, particularly in connection with the permitting and development of any mine at the Livengood Gold Project;
- the accuracy of the Company's resource estimates (including with respect to size and grade) and the geological, operational and price assumptions on which these are based;
- the timing of the ability to commence and complete planned work programs at the Livengood Gold Project;
- the terms of the consents, permits and authorizations necessary to carry out planned exploration and development programs at the Livengood Gold Project and the Company's ability to comply with such terms on a safe and cost-effective basis;
- the ongoing relations of the Company with the lessors of its property interests and applicable regulatory agencies;
- the metallurgy and recovery characteristics of samples from certain of the Company's mineral properties and whether such characteristics are reflective of the deposit as a whole; and
- the continued development of and potential construction of any mine at the Livengood Gold Project property not requiring consents, approvals, authorizations or permits that are materially different from those identified by the Company.

Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein. This list is not exhaustive of the factors that may affect any of the Company's forward-looking statements. Forward-looking statements are statements about the future and are inherently uncertain, and actual achievements of the Company or other future events or conditions may differ materially from those reflected in the forward-looking statements due to a variety of risks, uncertainties and other factors, including without limitation those discussed in Part I, Item 1A, Risk Factors, of our Annual Report on Form 10-K for the year ended December 31, 2013 and in Part II, Item 1A, Risk Factors, of this Quarterly Report on Form 10-Q, which are incorporated herein by reference, as well as other factors described elsewhere in this report and the Company's other reports filed with the SEC.

The Company's forward-looking statements contained in this Quarterly Report on Form 10-Q are based on the beliefs, expectations and opinions of management as of the date of this report. The Company does not assume any obligation to update forward-looking statements if circumstances or management's beliefs, expectations or opinions should change, except as required by law. For the reasons set forth above, investors should not attribute undue certainty to or place undue reliance on forward-looking statements.

INTERNATIONAL TOWER HILL MINES LTD.
(An Exploration Stage Company)
NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
Nine Months Ended September 30, 2014 and 2013
(Expressed in US dollars — Unaudited)

1. GENERAL INFORMATION, NATURE AND CONTINUANCE OF OPERATIONS

International Tower Hill Mines Ltd. (“ITH” or the “Company”) is incorporated under the laws of British Columbia, Canada. The Company’s head office address is 2300-1177 West Hastings Street, Vancouver, British Columbia, Canada. International Tower Hill Mines Ltd. consists of ITH and its wholly owned subsidiaries Tower Hill Mines, Inc. (“TH Alaska”) (an Alaska corporation), Tower Hill Mines (US) LLC (“TH US”) (a Colorado limited liability company), Livengood Placers, Inc. (“LPI”) (a Nevada corporation), and 813034 Alberta Ltd. (an Alberta corporation). The Company is in the business of acquiring, exploring and evaluating mineral properties, and either joint venturing or developing these properties further or disposing of them when the evaluation is completed. At September 30, 2014, the Company was in the exploration stage and controls a 100% interest in its Livengood Gold Project in Alaska, U.S.A.

The business of mining and exploration involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable mining operations. The Company has no source of revenue, and has significant cash requirements to meet its administrative overhead and maintain its mineral property interests. The recoverability of amounts shown for capitalized acquisition costs is dependent on several factors. These include the discovery of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the development of these properties, and future profitable production or proceeds from disposition of capitalized acquisition costs. The success of the above initiatives cannot be assured. In the event that the Company is unable to obtain the necessary financing in the short-term, it may be necessary to defer certain discretionary expenditures and other planned activities.

2. BASIS OF PRESENTATION

These unaudited condensed consolidated interim financial statements have been prepared in accordance with accounting principles generally accepted in the United States (“U.S. GAAP”) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X under the Securities Exchange Act of 1934, as amended. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for annual financial statements. These unaudited condensed consolidated interim financial statements should be read in conjunction with the audited consolidated financial statements for the year ended December 31, 2013 as filed in our Annual Report on Form 10-K. In the opinion of the Company’s management these financial statements reflect all adjustments, consisting of normal recurring adjustments, necessary to present fairly the Company’s financial position at September 30, 2014 and the results of its operations for the nine months then ended. Operating results for the nine months ended September 30, 2014 are not necessarily indicative of the results that may be expected for the year ending December 31, 2014. The 2013 year-end balance sheet data was derived from audited financial statements but does not include all disclosures required by U.S. GAAP.

The preparation of financial statements in conformity with U.S. GAAP requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the period. These judgments, estimates and assumptions are continuously evaluated and are based on management’s experience and knowledge of the relevant facts and circumstances. While management believes the estimates to be reasonable, actual results could differ from those estimates and could impact future results of operations and cash flows.

INTERNATIONAL TOWER HILL MINES LTD.
(An Exploration Stage Company)
NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
Nine Months Ended September 30, 2014 and 2013
(Expressed in US dollars — Unaudited)

Basis of consolidation

These consolidated financial statements include the accounts of ITH and its wholly owned subsidiaries TH Alaska, TH US, LPI and 813034 Alberta Ltd. All intercompany transactions and balances have been eliminated.

Recently adopted accounting pronouncements

In June 2014, the Financial Accounting Standards Board issued Accounting Standards Update 2014-10, Development Stage Entities (Topic 915): Elimination of Certain Financial Reporting Requirements (“ASU 2014-10”). ASU 2014-10 eliminates the distinction of a development stage entity and certain related disclosure requirements, including the elimination of inception-to-date information on the statements of operations, cash flows and stockholders’ equity. The amendments in ASU 2014-10 are effective for annual reporting periods beginning after December 15, 2014, and interim periods within those annual periods. Early adoption of this standard is permitted and the Company adopted the provisions of ASU 2014-10 during the quarter ended June 30, 2014. The adoption of ASU 2014-10 impacts the presentation of the statements of operations and comprehensive income and the statements of cash flows as these statements no longer contain financial information from the inception of the Company to the date of the financial statements.

3. FAIR VALUE OF FINANCIAL INSTRUMENTS

The carrying values of cash and cash equivalents, accounts receivable and accounts payable and accrued liabilities approximate their fair values due to the short-term maturity of these financial instruments.

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the significance of the inputs used in making the measurement. The three levels of the fair value hierarchy are as follows:

- Level 1 — Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 — Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 — Inputs that are not based on observable market data.

Livengood Gold Project Property

The Livengood Gold Project property is located in the Tintina gold belt approximately 113 kilometers (70 miles) northwest of Fairbanks, Alaska. The property consists of land leased from the Alaska Mental Health Trust, a number of smaller private mineral leases, Alaska state mining claims purchased or located by the Company and patented ground held by the Company.

Details of the leases are as follows:

- a) a lease of the Alaska Mental Health Trust mineral rights having a term beginning July 1, 2004 and extending 19 years until June 30, 2023, subject to further extensions beyond June 30, 2023 by either commercial production or payment of an advance minimum royalty equal to 125% of the amount paid in year 19 and diligent pursuit of development. The lease requires minimum work expenditures and advance minimum royalties which escalate annually with inflation. A net smelter return (“NSR”) production royalty of between 2.5% and 5.0% (depending upon the price of gold) is payable to the lessor with respect to the lands subject to this lease. In addition, an NSR production royalty of 1% is payable to the lessor with respect to the unpatented federal mining claims subject to the lease described in b) below and an NSR production royalty of between 0.5% and 1.0% (depending upon the price of gold) is payable to the lessor with respect to the lands acquired by the Company as a result of the purchase of Livengood Placers, Inc. in December 2011. As of September 30, 2014 the Company has paid \$1,648,923 from the inception of this lease.
- b) a lease of federal unpatented lode mining claims having an initial term of ten years commencing on April 21, 2003 and continuing for so long thereafter as advance minimum royalties are paid and mining related activities, including exploration, continue on the property or on adjacent properties controlled by the Company. The lease requires an advance minimum royalty of \$50,000 on or before each anniversary date (all of which minimum royalties are recoverable from production royalties). An NSR production royalty of between 2% and 3% (depending on the price of gold) is payable to the lessors. The Company may purchase 1% of the royalty for \$1,000,000. As of September 30, 2014, the Company has paid \$530,000 from the inception of this lease.
- c) a lease of patented lode claims having an initial term of ten years commencing January 18, 2007, and continuing for so long thereafter as advance minimum royalties are paid. The lease requires an advance minimum royalty of \$20,000 on or before each anniversary date through January 18, 2017 and \$25,000 on or before each subsequent anniversary (all of which minimum royalties are recoverable from production royalties). An NSR production royalty of 3% is payable to the lessors. The Company may purchase all interests of the lessors in the leased property (including the production royalty) for \$1,000,000 (less all minimum and production royalties paid to the date of purchase), of which \$500,000 is payable in cash over four years following the closing of the purchase and the balance of \$500,000 is payable by way of the 3% NSR production royalty. As of September 30, 2014, the Company has paid \$115,000 from the inception of this lease.
- d) a lease of unpatented federal lode mining and federal unpatented placer claims having an initial term of ten years commencing on March 28, 2007, and continuing for so long thereafter as advance minimum royalties are paid and mining related activities, including exploration, continue on the property or on adjacent properties controlled by the Company. The lease requires an advance minimum royalty of \$15,000 on or before each anniversary date (all of which minimum royalties are recoverable from production royalties). The Company is required to pay the lessor the sum of \$250,000 upon making a positive production decision, payable \$125,000 within 120 days of the decision and \$125,000 within a year of the decision (all of which are recoverable from production royalties). An NSR production royalty of 2% is payable to the lessor. The Company may purchase all of the interest of the lessor in the leased property (including the production royalty) for \$1,000,000. As of September 30, 2014, the Company has paid \$83,000 from the inception of this lease.

 (Expressed in US dollars — Unaudited)

Title to mineral properties

The acquisition of title to mineral properties is a detailed and time-consuming process. The Company has taken steps to verify title to mineral properties in which it has an interest. Although the Company has taken every reasonable precaution to ensure that legal title to its properties is properly recorded in the name of the Company, there can be no assurance that such title will ultimately be secured.

5. ACCRUED LIABILITIES

The following table presents the accrued liabilities balances at September 30, 2014 and December 31, 2013.

	<u>September 30, 2014</u>	<u>December 31, 2013</u>
Accrued liabilities	\$ 266,870	\$ 540,486
Accrued severance	12,659	719,375
Accrued salaries and benefits	142,331	191,366
Total accrued liabilities	<u>\$ 421,860</u>	<u>\$ 1,451,227</u>

Accrued liabilities at September 30, 2014 include accruals for general corporate costs and project costs of \$123,254 and \$143,616, respectively. Accrued liabilities at December 31, 2013 include accruals for general corporate costs and project costs of \$115,020 and \$425,466, respectively.

6. DERIVATIVE LIABILITY

During 2011, the Company acquired certain mining claims and related rights in the vicinity of the Livengood Gold Project located near Fairbanks, Alaska. The aggregate consideration was \$13,500,000 in cash plus an additional contingent payment based on the five-year average daily gold price (“Average Gold Price”) from the date of the acquisition. The contingent payment will equal \$23,148 for every dollar that the Average Gold Price exceeds \$720 per troy ounce. If the Average Gold Price is less than \$720, there will be no additional contingent payment.

At initial recognition on December 13, 2011 the derivative liability was valued at \$23,100,000. The key assumption used in the valuation of the derivative is the estimate of the future Average Gold Price. The estimate of the future Average Gold Price was determined using a forward curve on future gold prices as published by the CME Group. The CME Group represents the merger of the Chicago Mercantile Exchange (CME), the Chicago Board of Trade (CBOT), the New York Mercantile Exchange (NYMEX) and its commodity exchange division, Commodity Exchange, Inc. (COMEX). Using this forward curve, the Company estimated an Average Gold Price based on actual gold prices to September 30, 2014 and projected gold prices from September 30, 2014 to the end of the five year period in December 2016 of \$1,374 per ounce of gold.

The fair value of the derivative liability and the estimated Average Gold Price are as follows:

	<u>Total</u>	<u>Average Gold Price (\$/oz.)</u>
Derivative value at December 31, 2013	\$ 14,800,000	\$ 1,360
Unrealized loss for the period	300,000	
Derivative value at September 30, 2014	<u>\$ 15,100,000</u>	<u>\$ 1,374</u>

7. SHARE CAPITAL

Authorized

500,000,000 common shares without par value. At September 30, 2014 and December 31, 2013 there were 98,068,638 shares issued and outstanding.

Share issuances

There were no share issuances during the nine months ended September 30, 2014.

Stock options

The Company has adopted an incentive stock option plan (the “2006 Plan”). The essential elements of the 2006 Plan provide that the aggregate number of common shares of the Company’s capital stock that may be made issuable pursuant to options granted under the 2006 Plan may not exceed 10% of the number of issued shares of the Company at the time of the granting of the options. Options granted under the 2006 Plan will have a maximum term of ten years. The exercise price of options granted under the 2006 Plan will not be less than the discounted market price of the common shares (defined as the last closing market price of the Company’s common shares immediately preceding the issuance of a news release announcing the granting of the options, less the maximum discount permitted under applicable stock exchange policies), or such other price as may be agreed to by the Company and accepted by the Toronto Stock Exchange. Options granted under the 2006 Plan vest immediately, unless otherwise determined by the directors at the date of grant.

During the nine months ended September 30, 2014, the Company granted incentive stock options to certain officers, employees and consultants of the Company to purchase a total of 2,480,000 common shares in the capital stock of the Company. The options will vest as to one-third on the grant date, one-third on the first anniversary and one-third on the second anniversary. The following table presents the options granted by the Company during the nine months ended September 30, 2014:

Options Granted During the Nine Months Ended September 30, 2014			
Grant Date	Expiry Date	Number of Options	Exercise Price (C\$)
February 25, 2014	February 25, 2022	1,360,000	\$ 1.11
February 25, 2014	February 25, 2022	690,000	\$ 0.73
March 10, 2014	March 10, 2022	430,000	\$ 1.11

A summary of the status of the stock option plan as of September 30, 2014, and December 31, 2013 and changes is presented below:

	Nine Months Ended September 30, 2014		Year Ended December 31, 2013	
	Number of Options	Weighted Average Exercise Price (C\$)	Number of Options	Weighted Average Exercise Price (C\$)
Balance, beginning of the period	5,493,000	\$ 3.57	8,570,000	\$ 4.73
Granted	2,480,000	\$ 1.00	613,000	\$ 2.18
Expired	—	\$ —	(1,040,000)	\$ 7.78
Forfeited	(600,000)	\$ 3.17	(1,550,000)	\$ 3.27
Cancelled	(1,519,000)	\$ 2.97	(1,100,000)	\$ 8.27
Balance, end of the period	<u>5,854,000</u>	\$ 2.68	<u>5,493,000</u>	\$ 3.57

The weighted average remaining life of options outstanding at September 30, 2014 was 4.75 years.

August 24, 2017	\$ 3.17	2,275,000	2,275,000	\$ 3.17	3,350,000	2,233,322
September 19, 2017	—	—	—	\$ 2.91	1,000,000	666,666
March 14, 2018	\$ 2.18	469,000	312,660	\$ 2.18	513,000	170,995
February 25, 2022	\$ 1.11	1,360,000	453,333	—	—	—
February 25, 2022	\$ 0.73	690,000	230,000	—	—	—
March 10, 2022	\$ 1.11	430,000	143,333	—	—	—
		<u>5,854,000</u>	<u>4,044,326</u>		<u>5,493,000</u>	<u>3,690,983</u>

A summary of the non-vested options as of September 30, 2014 and changes during the nine months ended September 30, 2014 is as follows:

Non-vested options:	Number of options	Weighted average grant-date fair value (C\$)
Outstanding at December 31, 2013	1,802,017	\$ 1.38
Granted	2,480,000	\$ 0.49
Forfeited	(200,001)	\$ 1.61
Vested	(2,272,342)	\$ 1.10
Outstanding at September 30, 2014	<u>1,809,674</u>	<u>\$ 0.49</u>

At September 30, 2014 there was unrecognized compensation expense of C\$472,949 related to non-vested options outstanding. The cost is expected to be recognized over a weighted-average remaining period of approximately 1.0 years.

Share-based payments

During the nine month period ended September 30, 2014, the Company granted 2,480,000 stock options with a fair value of C\$1,224,537, calculated using the Black-Scholes option pricing model. Share-based payment charges for the nine months ended September 30, 2014 totaled \$1,140,879.

During the nine month period ended September 30, 2013, the Company granted 613,000 stock options with a fair value of C\$304,585, calculated using the Black-Scholes option pricing model. Share-based payment charges for the nine months ended September 30, 2013 totaled \$3,654,224.

The following weighted average assumptions were used for the Black-Scholes option pricing model calculations:

	September 30, 2014	December 31, 2013
Expected life of options	6 years	4 years
Risk-free interest rate	1.83%	1.29%
Annualized volatility	81.02%	59.48%
Dividend rate	0.00%	0.00%
Exercise price (C\$)	\$1.00	\$2.18

The expected volatility used in the Black-Scholes option pricing model is based on the historical volatility of the Company's shares.

(Expressed in US dollars — Unaudited)

9. COMMITMENTS

The following table discloses, as of September 30, 2014, the Company's contractual obligations including anticipated mineral property payments and work commitments and committed office and equipment lease obligations. Under the terms of the Company's mineral property purchase agreements, mineral leases and the terms of the unpatented mineral claims held by it, the Company is required to make certain scheduled acquisition payments, incur certain levels of expenditures, make lease or advance royalty payments, make payments to government authorities and incur assessment work expenditures as summarized in the table below in order to maintain and preserve the Company's interests in the related mineral properties. If the Company is unable or unwilling to make any such payments or incur any such expenditures, it is likely that the Company would lose or forfeit its rights to acquire or hold the related mineral properties. The following table assumes that the Company retains the rights to all of its current mineral properties, but no other lease purchase or royalty buyout options:

	Payments Due by Year						Total
	2014	2015	2016	2017	2018	2019 and beyond	
Livengood Property Purchase ⁽¹⁾	\$ —	\$ —	\$ 15,100,000	\$ —	\$ —	\$ —	\$ 15,100,000
Mineral Property Leases ⁽²⁾	—	412,398	417,309	422,294	432,353	437,488	2,121,842
Mining Claim Government Fees	54,810	114,345	114,345	114,345	114,345	114,345	626,535
Office and Equipment Lease Obligations	58,603	80,947	—	—	—	—	139,550
Total	\$ 113,413	\$ 607,690	\$ 15,631,654	\$ 536,639	\$ 546,698	\$ 551,833	\$ 17,987,927

- (1) The amount payable in December 2016 of \$15,100,000 represents the fair value of the Company's derivative liability as at September 30, 2014 and will be revalued at each subsequent reporting period. See note 6.
- (2) Does not include required work expenditures, as it is assumed that the required expenditure level is significantly below the work which will actually be carried out by the Company. Does not include potential royalties that may be payable (other than annual minimum royalty payments). See note 4.

ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following Management’s Discussion and Analysis of Financial Condition and Results of Operations (“MD&A”) should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2013. All currency amounts are stated in US dollars unless noted otherwise.

Current Business Activities

Livengood Gold Project

During the nine months ended September 30, 2014, and to the date of this MD&A, the Company has been investigating a number of opportunities, including those identified in the September 4, 2013 Feasibility Study (the “Feasibility Study”) and those subsequently developed by the Company, for optimization and reducing project costs. The mine plan was reviewed and modified to include changing pit slope designs, improvement of scheduling ore release, waste mining and stockpile management. This revised mine plan will form the basis for future project economics as other opportunities are fully reviewed.

The Feasibility Study metallurgical test work was reviewed to identify opportunities for optimization that may be confirmed by additional testwork to be contemplated in the future. Opportunities include potential improvements to head grade, gravity recovery, reductions in power consumption, reductions in reagent consumption and cost, and reductions in leach retention time. Power supply alternatives were reviewed to determine how changing energy supply dynamics might impact the project assumptions regarding electrical generation. Construction and operations camp alternatives were reviewed to better define the costs of supporting the manpower requirements for the project. The Company has also continued to advance environmental baseline work in support of future permitting in order to better position the Livengood Gold Project for a potential construction decision when warranted by market conditions.

In light of the decrease in the gold price in 2013 and 2014 and its effect on the gold mining industry, the Company has prepared for the potential of a continuing lower gold price by limiting 2014 spending to essential activities. These activities include payment of annual land lease obligations, reviewing opportunities to improve the Feasibility Study released in 2013, continuing critical environmental baseline work to prevent any significant delays in future permitting, as well as performing required corporate and compliance matters. As part of the Company’s efforts to reduce spending in 2014, the Company’s full time staff was reduced by approximately 30% effective January 1, 2014.

The Company remains open to a strategic alliance to help support the future development of the Project while considering all other appropriate financing options. The size of the gold resource, the favorable location, and the proven team are some of the reasons the Company would potentially attract a strategic partner with a long term development horizon who understands the Project is highly leveraged to gold prices.

Results of Operations

Summary of Quarterly Results

Description	September 30, 2014	June 30, 2014	March 31, 2014	December 31, 2013
Net loss	\$ (1,170,906)	\$ (1,431,402)	\$ (3,510,319)	\$ (1,022,387)
Basic and diluted net loss per common share	\$ (0.01)	\$ (0.01)	\$ (0.04)	\$ (0.01)
	September 30, 2013	June 30, 2013	March 31, 2013	December 31, 2012
Net loss	\$ (4,124,761)	\$ (642,050)	\$ (4,063,282)	\$ (7,258,397)
Basic and diluted net loss per common share	\$ (0.04)	\$ (0.01)	\$ (0.04)	\$ (0.07)

Three Months Ended September 30, 2014 compared to Three Months Ended September 30, 2013

The Company incurred a net loss of \$1,170,906 for the three month period ended September 30, 2014, compared to a net loss of \$4,124,761 for the three month period ended September 30, 2013. The decrease in net loss in the three months ended September 30, 2014 compared to the three months ended September 30, 2013 is mainly a factor of decreased project spending and changes in noncash items between periods as further discussed below. The following discussion highlights

Table of Contents

certain selected financial information and changes in operations between the three months ended September 30, 2014 and the three months ended September 30, 2013.

Mineral property expenditures decreased significantly to \$557,735 for the three months ended September 30, 2014 from \$1,621,127 for the three months ended September 30, 2013 primarily due to the Company completing the Feasibility Study in 2013 and limiting activities to continuation of critical environmental baseline work and reviewing Feasibility Study opportunities in 2014.

Share-based payment charges were \$233,726 during the three months ended September 30, 2014 compared to \$904,343 during the three months ended September 30, 2013. The decrease in share-based payment charges during the period was mainly the result of a reduction in the fair value of options granted during the first quarter of 2014 compared to 2013, vesting of prior period grants and forfeitures of options during the first quarter of 2014.

Share-based payment charges

Share-based payment charges for the three month periods ended September 30, 2014 and 2013 were allocated as follows:

<u>Expense category:</u>	<u>September 30, 2014</u>	<u>September 30, 2013</u>
Consulting	\$ 54,626	\$ 359,007
Investor relations	9,328	15,681
Wages and benefits	169,772	529,655
	<u>\$ 233,726</u>	<u>\$ 904,343</u>

Share-based payments to consultants decreased from \$359,007 to \$54,626 as a result of forfeitures of previously granted stock options to consultants in the first quarter of 2014. Excluding share-based payment charges of \$169,772 and \$529,655 respectively, wages and benefits for the period decreased to \$613,096 during the three months ended September 30, 2014 from \$896,838 during the three months ended September 30, 2013 as a result of decreased personnel during the period. As part of its reduced spending plan, the Company decreased its full-time staff by approximately 30% effective January 1, 2014.

Most other expense categories reflected moderate decreases period over period reflecting the Company's efforts to reduce spending.

Total other income amounted to \$600,236 during the three month period ended September 30, 2014 compared to total other expense of \$264,726 during the three month period ended September 30, 2013. The current period amount resulted mainly from an unrealized gain of \$400,000 on the revaluation of the derivative liability at September 30, 2014 resulting from a decrease in the historical and estimated future average price of gold, compared to no change on the revaluation of the derivative liability during the prior year period. The Company also had a foreign exchange gain of \$186,038 during the three month period ended September 30, 2014 compared to a loss of \$287,591 during the three month period ended September 30, 2013. The average exchange rate during the three month period ended September 30, 2014 was C\$1 to US\$0.9183 compared to C\$1 to US\$0.9629 for the three month period ended September 30, 2013.

Nine Months Ended September 30, 2014 compared to Nine Months Ended September 30, 2013

The Company incurred a net loss of \$6,112,627 for the nine month period ended September 30, 2014, compared to a net loss of \$8,830,093 for the nine month period ended September 30, 2013. The following discussion highlights certain selected financial information and changes in operations between the nine months ended September 30, 2014 and the nine months ended September 30, 2013.

Mineral property expenditures decreased significantly to \$1,957,849 for the nine months ended September 30, 2014 from \$6,868,226 for the nine months ended September 30, 2013 primarily due to the Company completing the Feasibility Study in 2013 and limiting activities to continuation of critical environmental baseline work and reviewing Feasibility Study opportunities in 2014.

Share-based payment charges were \$1,140,879 during the nine months ended September 30, 2014 compared to \$3,654,224 during the nine months ended September 30, 2013. The decrease in share-based payment charges during the period was primarily the result of a reduction in the fair value of options granted during the period, vesting of prior option grants as well as forfeitures during 2014. The Company granted 2,480,000 options during the nine months ended September 30, 2014 compared to 613,000 during the nine months ended September 30, 2013.

Table of Contents

Share-based payment charges

Share-based payment charges for the nine month periods ended September 30, 2014 and 2013 were allocated as follows:

Expense category:	September 30, 2014	September 30, 2013
Consulting	\$ 58,451	\$ 1,301,550
Investor relations	62,477	32,991
Wages and benefits	1,019,951	2,319,683
	<u>\$ 1,140,879</u>	<u>\$ 3,654,224</u>

Excluding share-based payment charges of \$1,019,951 and \$2,319,683, respectively, wages and benefits decreased to \$1,782,472 during the nine months ended September 30, 2014 from \$2,746,897 during the nine months ended September 30, 2013 as a result of decreased personnel during the current year period.

All other expense categories reflected moderate decreases period over period reflecting the Company's efforts to reduce spending.

Total other income amounted to \$47,615 during the nine month period ended September 30, 2014 compared to total other income of \$6,103,847 during the nine month period ended September 30, 2013. The amount in the current period resulted mainly from a gain on foreign exchange of \$301,598 offset by an unrealized loss of \$300,000 on the revaluation of the derivative liability at September 30, 2014 resulting from an increase in the calculated average price of gold. The prior year amount resulted from an unrealized gain of \$5.7 million on the revaluation of the derivative liability during the prior period from a decrease in the calculated average price of gold and a gain on foreign exchange of \$622,232. Offsetting the prior year total other income was a loss of \$298,769 related to the other than temporary impairment of certain available-for-sale securities. The average exchange rate during the nine month period ended September 30, 2014 was C\$1 to US\$0.9139 compared to C\$1 to US\$0.9770 for the nine month period ended September 30, 2013.

Liquidity and Capital Resources

The Company has no revenue generating operations from which it can internally generate funds. To date, the Company's ongoing operations have been predominantly financed through the sale of its equity securities by way of private placements and the subsequent exercise of share purchase and broker warrants and options issued in connection with such private placements. However, the exercise of warrants/options is dependent primarily on the market price and overall market liquidity of the Company's securities at or near the expiry date of such warrants/options (over which the Company has no control) and therefore there can be no guarantee that any existing warrants/options will be exercised.

As at September 30, 2014, the Company reported cash and cash equivalents of \$7,861,603 compared to \$13,925,601 at December 31, 2013. The decrease of approximately \$6.1 million resulted from corporate expenditures and expenditures on the Livengood Gold Project for continuation of environmental baseline activities and review of project opportunities of \$5.0 million, payment of severance liabilities of \$0.6 million, and the effect of foreign exchange on cash of \$0.5 million. The Company continues to utilize its cash resources to fund the Livengood Gold Project environmental activities required for preservation of baseline database and future permitting, Feasibility Study recommendations, including related mine planning and other project improvements, as well as corporate administrative requirements.

Investing activities during the nine months ended September 30, 2014 comprised solely of the change in restricted cash and capitalized acquisition costs related to land acquisitions closed in January 2014. The Company had no investing activities during the nine months ended September 30, 2013.

The Company had no cash flows from financing activities during the nine month periods ended September 30, 2014 and 2013.

As at September 30, 2014, the Company had working capital of \$7,503,289 compared to working capital of \$12,699,227 at December 31, 2013. To advance the Livengood Gold Project towards permitting and development, the Company anticipates maintaining certain essential development activities for the current fiscal year ending December 31, 2014. These essential activities include maintaining environmental baseline data that in its absence could materially delay future permitting of the Livengood Gold Project. The Company anticipates spending approximately \$8 million during fiscal year 2014 to maintain the environmental baseline activity, review opportunities, including those identified in the Feasibility Study and those subsequently developed by the Company, as well as perform required general and administrative duties. As at September 30,

Table of Contents

2014 the Company has spent approximately \$4.9 million on the aforementioned activities. As part of the Company's reduced spending plan, ITH reduced its full-time staff by approximately 30% effective January 1, 2014.

The Company expects that it will operate at a loss for the foreseeable future. The Company will require significant additional financing to continue its operations (including general and administrative expenses) in connection with post-Feasibility Study activities at the Livengood Gold Project and the development of any mine that may be determined to be built at the Livengood Gold Project. Despite the Company's success to date in raising significant equity financing to fund its operations, there is significant uncertainty that the Company will be able to secure any additional financing in the current or future equity markets. See "We will require additional financing to fund exploration and, if warranted, development and production. Failure to obtain additional financing could have a material adverse effect on our financial condition and results of operation and could cast uncertainty on our ability to continue as a going concern" in Part I, Item 1A, Risk Factors, in our Annual Report on Form 10-K for the year ended December 31, 2013. The quantity of funds to be raised and the terms of any proposed equity financing that may be undertaken will be negotiated by management as opportunities to raise funds arise. Specific plans related to the use of proceeds will be devised once financing has been completed and management knows what funds will be available for these purposes.

Other than cash held by its subsidiaries for their immediate operating needs in Alaska and Colorado, all of the Company's cash reserves are on deposit with a major Canadian chartered bank. The Company does not believe that the credit, liquidity or market risks with respect thereto have increased as a result of the current market conditions. However, to achieve greater security for the preservation of its capital, the Company has, of necessity, been required to accept lower rates of interest which has also lowered its potential interest income.

Contractual Obligations

The following table discloses, as of September 30, 2014, the Company’s contractual obligations including anticipated mineral property payments and work commitments and committed office and equipment lease obligations. Under the terms of the Company’s mineral property purchase agreements, mineral leases and the terms of the unpatented mineral claims held by it, the Company is required to make certain scheduled acquisition payments, incur certain levels of expenditures, make lease or advance royalty payments, make payments to government authorities and incur assessment work expenditures as summarized in the table below in order to maintain and preserve the Company’s interests in the related mineral properties. If the Company is unable or unwilling to make any such payments or incur any such expenditures, it is likely that the Company would lose or forfeit its rights to acquire or hold the related mineral properties. The following table assumes that the Company retains the rights to all of its current mineral properties, but no other lease purchase or royalty buyout options:

	Payments Due by Year						2019 and beyond	Total
	2014	2015	2016	2017	2018			
Livengood Property Purchase ⁽¹⁾	\$ —	\$ —	\$ 15,100,000	\$ —	\$ —	\$ —	\$ —	\$ 15,100,000
Mineral Property Leases ⁽²⁾	—	412,398	417,309	422,294	432,353	437,488	437,488	2,121,842
Mining Claim Government Fees	54,810	114,345	114,345	114,345	114,345	114,345	114,345	626,535
Office and Equipment Lease Obligations	58,603	80,947	—	—	—	—	—	139,550
Total	\$ 113,413	\$ 607,690	\$ 15,631,654	\$ 536,639	\$ 546,698	\$ 551,833	\$ 551,833	\$ 17,987,927

- (1) The amount payable in December 2016 of \$15,100,000 represents the fair value of the Company’s derivative liability as at September 30, 2014 and will be revalued at each subsequent reporting period.
- (2) Does not include required work expenditures, as it is assumed that the required expenditure level is significantly below the work which will actually be carried out by the Company. Does not include potential royalties that may be payable (other than annual minimum royalty payments).

Off-Balance Sheet Arrangements

The Company does not have any off balance sheet arrangements.

Environmental Regulations

The operations of the Company may in the future be affected from time to time in varying degrees by changes in environmental regulations, including those for future removal and site restoration costs. Both the likelihood of new regulations and their overall effect upon the Company vary greatly and are not predictable. The Company’s policy is to meet or, if possible, surpass standards set by relevant legislation by application of technically proven and economically feasible measures.

Certain U.S. Federal Income Tax Considerations for U.S. Holders

The Company has been a “passive foreign investment company” (“PFIC”) for U.S. federal income tax purposes in recent years and expects to continue to be a PFIC in the future. Current and prospective U.S. shareholders should consult their tax advisors as to the tax consequences of PFIC classification and the U.S. federal tax treatment of PFICs. Additional information on this matter is included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2013, under “Part II. Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities - Certain U.S. Federal Income Tax Considerations for U.S. Holders.”

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company has exposure to market risk in areas of interest rate risk, foreign currency exchange rate risk, and other price risk.

Interest Rate Risk

Interest rate risk consists of the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Company's cash and cash equivalents consists of cash and cash equivalents held in bank accounts and short term deposit certificates or Guaranteed Investment Certificates with a major Canadian financial institution that earn interest at variable interest rates. Future cash flows from interest income on cash and cash equivalents will be affected by interest rate fluctuations. Due to the short-term nature of these financial instruments, fluctuations in market rates do not have a significant impact on estimated fair values.

At September 30, 2014, the Company held a total of \$6,951,623 in cash equivalents which consist of interest saving accounts and Guaranteed Investment Certificates.

The Company manages interest rate risk by maintaining an investment policy that focuses primarily on preservation of capital and liquidity. The Company's sensitivity analysis suggests that a 0.5% change in interest rates would affect interest income by approximately \$20,000.

Foreign Currency Risk

The Company is exposed to foreign currency risk to the extent that certain monetary financial instruments and other assets are denominated in Canadian dollars. As the majority of the Company's assets, aside from cash, are denominated in US dollars, currency risk is limited to those Canadian cash balances. The Company has not entered into any foreign currency contracts to mitigate this risk. The Company's sensitivity analysis suggests that a consistent 7.5% change in the absolute rate of exchange for the Canadian dollar would affect net assets by approximately \$309,000. Furthermore, depending on the amount of cash held by the Company in Canadian dollars at the end of each reporting period using the period end exchange rate, significant changes in the exchange rates could cause significant changes to the currency translation amounts recorded to accumulated other comprehensive income.

As at September 30, 2014, USD amounts were converted at a rate of C\$1 to US \$0.8922.

Credit Risk

Concentration of credit risk exists with respect to the Company's Canadian cash and cash equivalents as all amounts are held at a major Canadian financial institution. Credit risk with regard to cash held in the United States is mitigated as the amount held in the United States is only sufficient to cover short-term requirements. With respect to receivables at September 30, 2014, the Company is not exposed to significant credit risk as the receivables are principally interest accruals.

Other Price Risk

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices, other than those arising from interest rate risk or foreign exchange risk. The Company's investments in marketable securities are exposed to such risk. The Company's derivative liability, which consists of a future contingent payment valued using historic and estimated future gold prices, is also exposed to other price risk. See Note 6 of the notes to the unaudited condensed consolidated interim financial statements included elsewhere in this Quarterly Report on Form 10-Q. The fair value of this liability will fluctuate with the average daily price of gold as well as with future projections for the average price of gold over the life of the obligation. For every dollar change in the average daily price of gold, the value of the derivative liability will change by \$23,148.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

As of September 30, 2014, an evaluation was carried out under the supervision of and with the participation of the Company's management, including the Chief Executive Officer (the principal executive officer) and Chief Financial Officer (the principal financial officer and accounting officer), of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act). Based on the evaluation, the Chief Executive Officer and the Chief Financial Officer have concluded that, as of September 30, 2014, the Company's disclosure controls and procedures were effective in ensuring that: (i) information required to be disclosed in reports filed or submitted to the SEC under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in applicable rules and forms and (ii) accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, in a manner that allows for timely decisions regarding required disclosures.

The effectiveness of our or any system of disclosure controls and procedures, however well designed and operated, can provide only reasonable assurance that the objectives of the system will be met and is subject to certain limitations, including the exercise of judgement in designing, implementing and evaluating controls and procedures and the assumptions used in identifying the likelihood of future events.

Changes in Internal Control over Financial Reporting

There were no changes in internal control over financial reporting during the quarter ended September 30, 2014 that have materially, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II — OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Not applicable.

ITEM 1A. RISK FACTORS

There have been no material changes to the risk factors previously disclosed in Part I, Item 1A of the Company's Annual Report on Form 10-K for the year ended December 31, 2013 and in Part II, Item 1A of the Quarterly Reports on Form 10-Q for the quarters ended March 31, 2014 and June 30, 2014, in each case under the heading "Risk Factors."

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Not applicable.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

Not applicable.

ITEM 4. MINE SAFETY DISCLOSURES

Pursuant to Section 1503(a) of the Dodd-Frank Act, issuers that are operators, or that have a subsidiary that is an operator, of a coal or other mine in the United States are required to disclose specified information about mine health and safety in their periodic reports. These reporting requirements are based on the safety and health requirements applicable to mines under the Federal Mine Safety and Health Act of 1977 (the "Mine Act") which is administered by the U.S. Department of Labor's Mine Safety and Health Administration ("MSHA"). During the nine month period ended September 30, 2014, the Company and its subsidiaries were not subject to regulation by MSHA under the Mine Act and thus no disclosure is required under Section 1503(a) of the Dodd-Frank Act.

ITEM 5. OTHER INFORMATION

Not applicable.

[Table of Contents](#)

ITEM 6. EXHIBITS

31.1	Certification of Chief Executive Officer pursuant to Exchange Act Rules 13a-14(a) and 15d-14(a), as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
31.2	Certification of Chief Financial Officer pursuant to Exchange Act Rules 13a-14(a) and 15d-14(a), as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
32.1	Certification of the Chief Executive Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
32.2	Certification of the Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
101	Interactive data files pursuant to Rule 405 of Regulation S-T: (i) the Condensed Consolidated Balance Sheets at September 30, 2014 and December 31, 2013, (ii) the Condensed Consolidated Interim Statements of Operations and Comprehensive Loss for the Three and Nine Months ended September 30, 2014 and 2013, (iii) the Condensed Consolidated Interim Statements of Changes in Shareholders' Equity for the Nine Months Ended September 30, 2014 and 2013, (iv) the Condensed Consolidated Interim Statements of Cash Flows for the Nine Months Ended September 30, 2014 and 2013, and (v) the Notes to the Condensed Consolidated Interim Financial Statements.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

CERTIFICATION

I, Thomas E. Irwin, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of International Tower Hill Mines Ltd.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
